

Happy
Birthday

THE MINOSAUR BOOK OF BIRTHDAYS

By Michael J Trigg

E-BOOK

What Are Minosaurs?

Minosaurs come from Nogardland, a very old place that was destroyed by comets and Draegons a long time ago. What are Draegons? Evil dragons that really do not like Minosaurs because Minosaurs are good and like to live in bright, clean and colorful surroundings.

Minosaurs also believe in keeping the environment clean and helping others, especially others who are less fortunate.

The Minosaurs are never seen by adults, They can only be seen by children who believe in them and people who are young at heart and older people who love kids. Each Minosaur is a different color and each one has very special talents. Minosaurs love music and each has each a unique musical note as part of their name.

To learn more about Minosaurs you could read Greanwold's first book "**Geanwold and the Mystery Cave**" or check them out at www.greanwold.com

FEBRUARY BOY MINOSAURS
